RE: HYDRAULIC MODEL ENHANCEMENT PROJECT, "Sole Source Request"
Calibration, SCADA Integration, Optimization and Operations Support Interface)

The City purchased its current SynerGee® System (hydraulic module system) from Advantica Stoner in 1993. Annually Advantica Stoner provides the routine maintenance services for this system.

Advantica Stoner is the only provider for the SynerGee® system. There are no other distributors or providers in the United States who can service the software or enhance the City's water hydraulic module system.

In that we have no intentions of replacing the current water distribution system hydraulic model in the next five (5) years, due to the sensitivity and complexity of this system and the need to have a maintenance agreement in place; the Department of Watershed Management is requesting approval of Advantica Stoner as a sole source for the maintenance services of this system.

Your cooperation is appreciated.
